DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-90, are drawn to a cosmetic or dermatological composition comprising at least one gradient copolymer, classified in class 424, subclass 401.
- II. Claim 91, is drawn to a cosmetic or dermatological method for treating keratinous substances, classified in class 424, subclass 357.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the product as claimed can be used in a materially different process of using the product, such as, employment in creating polymer brushes.

Possible Notice of Rejoinder

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Election of Species

This application contains claims directed to the following patentably distinct species: (a) one hydrophilic monomeric residue; (b) C₁-C₄ N,N-dialkyl(meth)acrylamides and C₁-C₄ N,N-diakylC₁-C₆aminoalkyl(meth)acrylamides; (c) a monomer capable of forming a homopolymer from claims 57, 63, 66 and 70 and (d) at least one additional

constituent. The species are independent or distinct because the species are all directed to a cosmetic or dermatological composition.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species (the examiner is requesting that the applicant elect a specifically named or completely defined hydrophilic monomeric residue (vinylamines, vinylpyridines, carboxylic acid, etc.); a specifically named or completely defined C₁-C₄ N,N-dialkyl(meth)acrylamides and C₁-C₄ N,N-diakylC₁-C₆aminoalkyl(meth)acrylamides (N,N-dimethylacrylamide, N,N-dimethylaminopropylacrylamide (DMAPA), and N,N-dimethylaminopropylmethacrylamide (DMPMA); a specifically named or completely defined monomer capable of forming a homopolymer elected from claims 57, 63, 66 and 70 (ethylenic hydrocarbons, isoprenes and butadienes, vinyl compounds, furfuryl, etc.); a specifically named and completely defined constituent (water, hydrophilic and lipophilic organic solvents, waxes of animal, vegetable, mineral and synthetic origin) that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1616

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

A telephone call was made to Attorney Thomas L. Irving on June 18, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.
